Gmail

1. Click the gear icon in Gmail and select **See all settings** from the Quick settings menu.

2. Navigate to **Filters and Blocked Addresses** in the top menu.

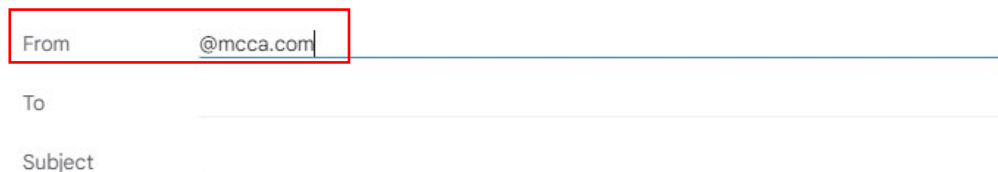

3. Select **Create a new filter**.

4. The "From" field is where you'll specify what's getting whitelisted. In Gmail, you can specify either a specific email address (e.g. events@mcca.com), or you can whitelist the entire MCCA domain by omitting everything before the at symbol (e.g. @mcca.com).

The former will whitelist one specific email address while the latter whitelists anyone who is sending emails from MCCA.
